Microlite2020

Old School Edition 1.01

Core Rules

Microlite2020 Old School Edition (OSE) is a trimmed-down, subminiature version of the 3.x Primary Fantasy SRD rules (see license for more info) that has been designed to be quick and easy to play. The goal was to create a simple game with some modern features, but one that would allow the use of material (adventures, etc.) designed for use with the 0e, B/X, or 1e versions of the world's most popular fantasy roleplaying game with minimal conversion.

Character Creation

To create a Microlite2020 OSE character:

1. Roll your character's Stats.
2. Choose an ancestry and choose one background (at 3 points) or one special ability from that ancestry's list. (Note that the ancestral background lists included in these rules are samples for a very standard RPG fantasy world, the GM should alter these to fit their campaign.)
3. Select a class.
4. Assign Background points.

Stats

There are 3 stats: Strength (STR), Dexterity (DEX), and Mind (MIND).

Roll 4d6, drop the lowest die, and total the remaining 3. Allocate this total to one of the stats. Repeat for each stat.

Stat bonus = (STAT-10)/3, round towards zero.

Ancestries

Dwarf - Tunnel Scout, Stonework, Mining, Smith, Ogre Killer
Elf - Woodsman, Animal Trainer, Fae noble, Magecraft, Refugee

Halfling - Chef, Herbalist, Scout, Con-woman

Human - Adaptable (+1 to all skill rolls), Thief, Alchemist, Soldier, Aristocratic Noble

Classes

The classes are Fighter, Rogue, Mage, Cleric. Characters begin at Level 1.

Fighter - Can use any armor and shields. *Combat Bonus* (CB) is level/2, round up. *Martial Ability* - +1 to all attack and damage rolls (increasing by +1 per four levels), add level to initiative rolls. +2 to STR

Rogue - Can use light armor. *Combat Bonus* (CB) is level/3, round up. *Sneak Attack* - if they successfully sneak up on a foe, they can attack with +4 to the attack roll and do more damage if successful (Levels 1-5, x2 damage; Levels 6-10, x3 damage; Levels 11-15, x4 damage; Level 16+, x5 damage).

Riposte - if melee attacker misses rogue, rogue can make an immediate free attack on that attacker in reply. +2 to DEX

Mage - Cannot use armor. *Combat Bonus* (CB) is level/4, round up, *Arcane Spellcasting* - Can cast arcane spells. +2 MIND

Cleric - Can wear up to medium armor. *Combat Bonus* is level/3, round up. *Divine Spellcasting* - Can cast divine spells. *Turn Undead* - Successful Magic attack vs. twice the Hit Dice of the type of undead. One undead flees per point over the roll needed. +2 MIND.

Backgrounds

Backgrounds represent pieces of your character's history that contributes to your character's history as well as their ability to succeed with non-combat skills. Each character has a number of points to allocate to a set of backgrounds. These are broad categories of experience (cat burglar, for example) rather than specific implementations of that experience (climbing and hiding). Backgrounds don't sync to a specific ability score, though some backgrounds obviously may get used more often with certain ability scores than others.

Assigning Background Points: Each character gets 8 background points. Assign your background points to as many backgrounds as you want, up to your total points. You can assign a maximum of 5 points to a single background (and minimum of 1). Up to 2 points may be added to an ancestral background during character creation. Choose backgrounds that help you make sense of your characters past, jobs, and settings. A few possible backgrounds include: acrobat, alchemist, animal trainer, architect, aristocratic noble, assassin, chef, con-woman, goblin exterminator, hunted outlaw, knight errant, magecraft, priest, refugee, scout, shepherd, soldier, spy, temple acolyte, thief, torturer, traveling martial arts pupil, tribal healer, tunnel scout, wandering minstrel, warrior poet, and so on.

Skills and Skill Checks

There are no skills in Microlite2020 OSE, at least not in the normal 3.x sense. Instead, players simply tell the GM what they are doing, and the GM decides if it will succeed in the specific situation, taking into account the characters' class and background. If the GM decides a random success chance is truly needed, the GM will call for a skill check.

Making Skill Checks

When you roll a skill check to find out if you succeed at a task or trick, the GM tells you which ability score is being tested. Then you choose the background you think is relevant to gain the points you have in that background as a bonus to the skill check (subject to GM approval, of course).

Most skill checks require you to equal or beat a Difficulty Class (DC), set by the GM based on the specific situation, to succeed.

To make a skill check, use this formula:

D20 + relevant ability modifier + level + relevant background points Vs. DC set by the situation

You can't apply multiple backgrounds to the same check; if more than one background could apply, the background with the highest (or tied for highest) bonus applies.

Saving Throws

Saving throws are handled as skill checks.

Basic Adventuring Skills

Unless a player specifies otherwise about a character at character creation, all characters are assumed to have basic practical adventuring skills such as maintaining weapons and armor, riding a horse, setting up a camp, swimming, climbing, cooking, first aid, tying knots, etc., and have a rough idea of the value of *common* coins, trade goods, gems, and jewels. Success should simply be assumed unless there are unusual conditions.

Languages

All character ancestries speak common. Other intelligent beings speak their own languages (20% chance of also speaking common). Characters with a MIND over 10 may speak one additional language per point of MIND over 10.

Magic

Magi can cast any arcane spell, and Clerics any divine spell, with a spell level equal or below 1/2 their class level, rounded up. GMs desiring a campaign based on the only the original three booklets from 1974 or the B/X edition from 1981 should use the spell lists in Appendix C, while those desiring a campaign based on all the 0e booklets and supplements or 1e should use the spell lists in Appendix D.

A Mage starts with three first level arcane spells in his spell book and can add more spells by finding (or buying) them on scrolls or books and copying them into his spell book. Clerics do not need spell books and automatically have access to all divine spells of a level they can cast (use of certain spells may be forbidden by the cleric's deity, however).

Casting a spell of any kind costs Hit Points. The cost is 1 + double the level of the spell being cast:

Spell Level	0	1	2	3	4	5	6	7	8	9
HP Cost	1	3	5	7	9	11	13	15	17	19

Spell Difficulty Class: For purposes of things like dispelling, the Difficulty Class (DC) for all spells is: 10 + Caster Level + Caster's MIND bonus

Signature Spells: Select one 'signature' spell per spell level from first upward that they prefer to use over any other. These spells are easier to cast due to familiarity, costing 1 less HP to use.

Combat Casting: In combat, if a character is hit and takes damage (or other effect that could interfere with spell casting like paralysis) before casting a spell, the spell fizzles. This costs the caster 1 HP per level of the spell he was attempting to cast, and the caster loses his action for the round. Characters casting spells in combat must remain stationary.

Combat

Surprise: At the beginning of an encounter, roll 1d6 for each side. On a roll of 1-2 a side is surprised and may not act at all in the first round. If attacking from an undetected ambush, the ambush victims are surprised on a roll of 1-4. A side cannot be surprised if it is aware of the other.

Initiative: Roll d20 + DEX bonus (plus level for Fighters) for initiative each round. Characters rolling higher than 12 act before the monsters/opposition, Characters rolling 12 or less take their turn after the monsters/opposition. Everyone can do one thing each turn; move, attack, cast a spell, charge attack, etc.

Actions: Combat is very abstract. Each combat round lasts a minute and includes a lot of jockeying for position, feints, etc. The "hit roll" determines if any damaging blows were delivered during the round. Everyone can do one thing each round; move, attack, cast a spell, etc. The GM may choose to allow some combined actions, like a charge attack, to be one thing. A 5-foot step/shift, drawing a weapon, speaking or similar activities are "free" and do not count as an action.

Opportunity Attacks: Anyone not surprised and with a ready weapon who is not already involved in a melee combat gets a free attack on opponents trying to move past them – this attack is in addition to their normal attack for the round. If the attack is successful, the opponents takes damage and can move no further that round.

Attack Rolls: Add attack bonus to d20 roll. If higher than your opponent's Armor Class (AC), it's a hit. A natural 20 that would otherwise hit is a critical hit doing maximum damage and doing a number of Wound Points damage equal to the number of damage dice rolled (normally 1). Monsters do not have Wound Points, so a critical hit will do maximum weapon damage plus a normal damage roll to them and cause them to lose their next attack.

Melee attack bonus = STR bonus + CB
Missile attack bonus = DEX bonus + CB
Magic attack bonus = MIND bonus + CB

Armor Class (AC) = 10 + DEX bonus + Armor bonus. Basic Armor Bonuses: Light Armor (e.g. leather) +2, Medium Armor (e.g. Chainmail) +4, Heavy Armor (e.g. Plate) +6; a shield adds +1; a large shield adds +2.

Fighters and Rogues can use DEX bonus + CB as Melee attack bonus instead if wielding a light weapon. Fighters and Rogues can wield 2 light weapons and attack with both in a round if they take a -2 penalty on all attack rolls that round.

Range Penalties: If the target is relatively close, there is no penalty to hit for range. If it's mid-range for the weapon you're using, take a -2. If it's farther out than that, the GM will assign a -4 to -10 penalty to hit, depending on his judgment of how far away the target is.

Helpless Targets: Regardless of attack roll and AC, all attacks on sleeping, paralyzed, or otherwise helpless targets automatically hit. If the attacker is not engaged by any other opponents, the helpless target can be automatically slain (if desired). Otherwise, a standard damage roll is made.

Add STR bonus to Melee damage, STR bonus x2 for 2-handed weapons.

Weapon Damage: Light weapons: 1d4. Medium Weapons: 1d6. Heavy Weapons 1d8. Optional: Use the damage listed for the specific weapon in Appendix A (Equipment List).

Morale: While a few monsters, such as mindless creatures, are fearless and will fight to the death, most monsters have a strong desire to survive and will not continue to fight when the battle is going against them. They will instead seek to retreat, to flee, or even to surrender. The GM decides when monsters abandon the battle and retreat, based on the situation and the monster's intelligence. Monsters are assigned a Morale Rating (from 2 to 12, with 2 being a complete coward and 12 being totally fearless) to help the GM make these decisions. If the GM wishes, he may simply roll 2d6 and have the monsters break off combat if the number rolled is greater than the monster's Morale Rating.

Energy Drain: Certain undead and demonic monsters can drain energy levels from characters. Each energy level drained reduces the character's level by one, the character may regain the level normally via experience.

Other Hazards

Falling: 1d6 damage per 10', half damage on DEX save. DC=depth fallen in feet

Spikes: add +1 point to falling damage per 10' fallen, max +10

Poison: STR save to avoid or for half, depending on poison. Effect varies with poison type.

Extreme Heat & Cold: If not wearing suitable protection, STR save once every 10 minutes (DC 15, +1 per previous check), taking 1d6 damage on each failed save.

Hit Points and Healing

Hit Points (HP): Hit Points are an abstract measure of the amount of damage a character can suffer before falling unconscious and taking severe injuries. First level characters have 1d6 + STR hit points. If Hit Points reach 0, the character is unconscious and begins to take severe physical injury. Further damage, including any remaining points of damage the attack that reduced hit points to zero, directly reduces Wound Points. Hit Points represent stamina, luck, minor cuts and scrapes, etc. Optional: To avoid confusion, "Hit Points" may be renamed "Fatigue Points."

First level characters start with 1d6+6+STR Bonus hit points. Characters gain an additional 1d6+STR Bonus hit points per level.

Wound Points (WP): All characters have Wound Points equal to their STR. If Wound Points reach 0, the character is dead. Each two points of Wound damage an Adventurer has suffered gives a -1 to all attack, success, saving, and similar rolls. Monsters do not have Wound Points, although important NPCs usually do.

Recovering Hit Points: All characters recover all hit points after six hours of total rest. If a character has lost Wound Points due to wounds, only 50% of total hit points lost are recovered per six hours of rest.

Healing Wound Point Damage: Wound Points lost recover at a rate equal to the character's STR Bonus (minimum of 1 point regained) per full day of rest. If a character with up to 50% Wound Point damage performs more than very light activity or careful travel during a day, he has a 50% chance of losing an additional Wound Point. If a character with more 50% of Wound Point damage does anything other than rest quietly in

bed during a day, he has a 50% chance of losing an additional Wound Point.

Effects of Healing Magic: Spells, potions, and other healing items cure Wound Points, not hit points. For example, a cure light wounds heals 1d2+1 WP and a cure serious wounds cures 3d2+3 WP, etc. See the Divine spells in Appendix C: Spell Lists for more details.

Hirelings

Players may find it useful to have their characters hire bearers to carry light sources into ruins and dungeons (and to carry treasure out) and men-at-arms to aid in combat. In some areas there may be a guild where such people may be found and hired, in other areas characters may have to advertise. Pay must be negotiated and what will be asked will depend on the situation the hirelings think they may get into and the reputation of the characters hiring them.

Bearers have 2 hit points and generally will only fight if cornered and there is no other choice – even then their effective level (used in attack rolls) is -2. They will carry light sources and baggage willingly so long as they are paid, fed, treated well, and not exposed to much mortal danger. Minimum pay: 1 SP/day.

Men-at-Arms will fight but consider being used as a bearer (except of treasure they get a share of) to be beneath them. Green Men-At-Arms have 4 hit points, an effective combat level (used in attack rolls) of 0 and can use whatever armor and weapons their employers provide. Minimum pay: 5 SP/day plus 1/20 of a share of any non-magical treasure found. Veteran Men-at-Arms have 7 hit points, an effective combat level (used in attack rolls) of 1 and can use whatever armor and weapons their employers provide. Minimum pay: 1 GP/day and 1/10 a share of any non-magical treasure found. Men-at-Arms will serve willingly as long as they are fed, paid, treated well, and not asked to take unusual risks that their employers are not taking with them.

Monster Reactions

Some monsters (like skeletons guarding a tomb) may always attack. In cases where the reaction of the monsters to the party is not obvious, the GM may opt to make a reaction roll for the monsters by rolling 2d6 and adding the MIND bonus (and any other appropriate modifiers) to the roll and consulting this table.

Adjusted Reaction Roll	Result
2 or less	Very Unfavorable
3-6	Unfavorable
7	Neutral/Uncertain
8-11	Favorable
12 or more	Very Favorable

Interpretation of the results is left to the GM; however, these general principles may prove helpful. Very Unfavorable means the monsters will most likely attack unless the odds are overwhelmingly against them. They will not help the characters. Unfavorable means the monsters are hostile and might attack unless they are given a good reason not to. They will not help the characters. Neutral means the monsters are unsure of the party. They are not likely to attack immediately, but are not friendly or helpful. Favorable means the monsters are willing to listen and are open to negotiation. They might be willing to be slightly helpful. Very Favorable means the

monsters like the characters and are willing to be somewhat helpful and are open to working with the party to mutual advantage.

Level Advancement

Characters get Experience Points (XP) when their party defeats monsters. Experience Points (XP) = Hit Dice of defeated monsters. Add +1 for each doubling of the number of foes. e.g.: 1 kobold (a 1 hit die monster) = 1 XP. 2 kobolds = 2 XP. 4 kobolds = 3 XP, 8 kobolds = 4 XP etc. Add +1 or +2 XP (GM's discretion) if the foes have dangerous special abilities.

Characters also earn a GM-assigned amount of experience points for defeating traps, solving puzzles, excellent roleplaying, and the like. The GM should assign XP depending on the situation (usually from 1 to 5 XP).

Individual characters can also earn experience points from spending money found in treasures (or taken from monsters) in totally frivolous ways (e.g. wine, women, song, donations to a temple without getting anything in return, generic "training," etc.). A character earns 1 XP for each (100 x current level) gp so spent.

Add up the Experience Points (XP) of every successful encounter you take part in plus any earned from GM specials and treasure spent. When the total is equal to your Experience Base x your current level, you've advanced to the next level. Reset the total XP to 0 after advancing.

Experience Base is set by the GM and determines advancement speed in the campaign. An experience base of 10 would allow meteoric advancement. An experience base of 20 would allow rapid advancement. An experience base of 30 or 40 allows slower advancement – more like the advancement pace of the TSR era.

Each level adds:
+1d6 + STR Bonus to Hit Points
+1 to any background

Fighters gain +1 to their attack and damage rolls at levels 4,8,12, etc.
Clerics and Magi gain access to new spell levels at levels 3,5,7,9, etc.

Example: Four newly minted second level adventurers have just completed a dungeon adventure. They each need 40 XP to reach third level. Their expedition was extremely successful. They defeated 22 XP worth of monsters and earned 7 XP from traps and other GM specials for a total of 29 XP each. The party's cleric earned 4 XP for great roleplaying while risking her life to save the party from an angry spirit. The party also found and recovered 5800gp in treasure from the dungeon. That's 1450gp each. The cleric decides to donate the entire sum to her temple and earn 7 more XP. This gives her 40 XP. She goes up to third level and her XP total is reset to 0. The other party members have 29 XP each.

Optional Rules

Hit Points and Healing

Bleeding (optional): A character who has been reduced to 0 hit points by weapon or other trauma-related damage will eventually bleed out and die if their wounds are not bound. A bleeding character must make a STR Save every minute or suffer one Wound Point of additional damage. Binding wounds takes 1 minute per point of Wound damage taken, but no further bleeding rolls are needed (including while the wounds are being bound). Any healing spell cast on a bleeding character will effectively stop the bleeding.

Healing Magic (Optional): Healing magic is not instantaneous, 1 Wound Point will be cured per 10 minutes of rest after the spell is cast (up to the maximum the spell will cure), if the rest is interrupted any remaining points of healing are lost.

Second Wind (Optional): Once per day, characters may regain 20% of their total hit points (round up) by resting in a safe place for an hour while eating a meal. This amount is reduced by 2 hp per point of Wound damage (to a minimum of 0 hp recovered).

Monster Wound Points (Optional): If the GM does not mind the added complexity, monsters may have Wound Points as well. A monster's Wound Points are equal to twice the number of hit dice.

Encumbrance

Characters can normally carry twelve (plus STR bonus) items in addition to armor, primary weapon, and possibly a shield; six items can be readily available dangling from a belt or slung over the shoulders, but everything else goes into the backpack. Small collections of things (10 flasks, 20 arrows, 50 gems, 100 gold pieces) count as a single item. Oversized items (two-handed weapons, anything as tall as the character or that requires two hands to carry) count as two items. A character carrying 6 or fewer items is unencumbered. A character carrying 7-12 items is lightly encumbered. A character carrying 13-18 items is heavily encumbered. A character carrying more than 18 items is over-encumbered. *Option:* Adjust number of items for each encumbrance class by the character's STR bonus.

Talents

At level 2 (and every 2nd level thereafter), characters may select one narrow area of skill where they are better than average: something they are "Good at." This talent should be either something directly related to their class or background -- or something they have spent game time and/or money learning. If the player wishes (and the GM approves), instead of selecting a new talent a talent the character is already "Good at" be improved to "Expert at" at a later level and a talent the character is "Expert at" may be improved a final time to "Master at" at yet a later level. The GM will consider the character's talents just as he would the character's class and background when deciding if a character will succeed with an action.

Talents let characters choose to be better than average in some specific, limited field. For example, while any character can try to swing from vines, a character that is "Good at: Swinging from Vines" is going to be more successful at it than the average character. If you need to assign numerical

benefits to talents for when a success roll is needed, +1 per level is a good place to start for most talents (i.e. Good at: +1, Expert at: +2, Master at: +3).

Allegiance

A character may have up to three allegiances, listed in order from most important to least important. These allegiances are indications of what the character values in life, and may encompass people, organizations, or ideals. A character may have no allegiances (being either a free spirit or a lone wolf) or may change allegiances as he or she goes through life. Also, just because the character fits into a certain category of people doesn't mean the character has to have that category as an allegiance.

If the character acts in a way that is detrimental to his or her allegiance, the GM may choose to strip the character of that allegiance (and all its benefits) and assign an allegiance more suitable to those actions.

Pledging Allegiance: A character's allegiance can take the form of loyalty to a person, to an organization, to a belief system, to a nation, or to an ethical or moral philosophy. In general, a character can discard an allegiance at any time, but may only gain a new allegiance after attaining a new level.

Having an allegiance implies having sufficient intelligence and wisdom to make a moral or ethical choice. As a result, a character must have Intelligence and Wisdom scores of 3 or higher in order to select allegiances.

Allegiances include, but are not limited to, the following examples.

Person or Group: This includes a leader or superior, a family, a group of linked individuals (such as a band of adventurers or a cell of secret agents), or a discrete unit within a larger organization (such as members of the character's squad or platoon, or individuals whose safety the character is responsible for).

Organization: This may be a company or corporation, a gathering of like-minded individuals, a fraternal brotherhood, a secret society, a branch of the armed forces, a local, state, or national government, a university, an employer, or an otherwise established authority.

Nation: This may or may not be the nation that the character currently resides in. It may be where the individual was born, or where the character resides after emigrating to a new home.

Belief System: This is usually a particular faith or religion, but can also be a specific philosophy or school of thought. Belief systems could also include political beliefs or philosophical outlooks.

Ethical Philosophy: This describes how one feels about order, as represented by law and chaos. An individual with a lawful outlook tends to tell the truth, keep his or her word, respect authority, and honor tradition, and he or she expects others to do likewise. An individual with a chaotic outlook tends to follow his or her instincts and whims, favor new ideas and experiences, and behave in a subjective and open manner in dealings with others.

Moral Philosophy: This describes one's attitude toward others, as represented by good and evil. An individual with a good allegiance tends to protect innocent life. This belief implies altruism, respect for life, and a concern for the dignity of

other creatures. An evil allegiance shows a willingness to hurt, oppress, and kill others, and to debase or destroy innocent life.

Allegiances and Influence: An allegiance can create an empathic bond with others of the same allegiance. With the GM's permission, the character gains a +2 circumstance bonus on reaction rolls when dealing with someone of the same allegiance—as long as the character has had some interaction with the other character to discover the connections and bring the bonus into play. Conversely, if the other party has an opposing allegiance, a -2 circumstance penalty on reaction rolls may be appropriate.

Energy Drain

If the standard energy drain rule seems too harsh, try the following instead. Each energy level drained subtracts one from any roll to which the character would add his level (or some fraction of it; e.g. level/2). 1 point of energy drained is recovered every L days where L is equal to the hit dice of the monster that drained the energy level.

Avoiding Save-or-“Die”

There are a number of effects which cause the character to be taken out of play permanently or for a long period of time unless a saving throw is made (e.g. instant death, turn to stone, etc.). If this standard rule seems too harsh, try the following instead. If a character fails a save-or-“die” roll, the negative effect happens immediately but it can be reversed if the character receives 5 minutes of careful care in a non-combat environment starting within a number of minutes/melee rounds equal to the affected character's CON stat. The GM may rule that certain issues still require further treatment within 24 hours or the effect recurs (e.g. poison must still be neutralized) or may not be handled this way at all.

Advantage & Disadvantage

Instead of the GM assigning positive or negative situational D20 die roll modifiers, the GM may simply assign advantage or disadvantage to the D20 die based on the situation. If the situation favors the action in a major way, the roll is made with Advantage. If the situation hinders the action in a major way, the roll is made with Disadvantage. If the situation neither favors nor hinders the action in a major way, the roll is made normally.

When a D20 roll had advantage or disadvantage, roll two D20s instead of one. Use the higher of the two rolls if you have advantage, and use the lower roll if you have disadvantage. For example, if a roll has disadvantage and the results of the roll are a 17 and a 5, use the 5. If the roll had advantage instead and the roll results in those numbers, use the 17.

Alternate Initiative

One of these optional rules can replace the standard Initiative rules:

- 1) Roll d20 + DEX bonus (plus class mods) for initiative. Monsters can be considered to have a DEX of 3 x HD. Act in Initiative order: high to low.
- 2) A character's Initiative is 10 + DEX stat (plus class mods). Monsters can be considered to have a DEX of 3 x HD. Act in Initiative order: high to low. If a character and monster tie, the character goes first. If a character is fighting another character/major NPC and their Initiative ties, each rolls a D20 with the higher roll going first.

Miniatures and Battle Maps

If you have miniature figures (about 1 inch or 25 to 28 mm tall) to represent the characters and their enemies and wish to use them to create more tactical battles, you will need a ruler or a battle map covered in spaces (squares, hexes or 1 inch measurements). One space equals 5 feet or 2 yards, and the average character and monster moves 6 spaces per turn even diagonally.

Small characters (like halflings or gnomes) move 5 spaces per turn, while characters wearing heavy armor (splint mail, banded mail, half-plate, full plate) move 1 space less each turn. On older-style maps, where one space equals 10 feet, the average character moves 3 spaces per turn.

Characters can move through the same space as another character or enemy, but cannot end movement in the same space as another figure. Attempting to move past an enemy (through the enemy space or a space next to an enemy) may trigger an opportunity attack. Rubble, darkness, heavy growth and other difficult terrain costs 2 spaces of movement per space moved by the character. Moving up and down is the same as moving horizontally (a character does not have to spend extra movement to climb or fly). Moving just 1 space is considered a “free” action, as long as the character does not move any farther that turn.

If there's a question whether a character could see an enemy to hit it, draw an imaginary straight line from the center of the attacker's space to the center of the target's space (or one of its spaces, if it takes up more than one space on the map). If there is no major obstacle or enemy in the path, the character can make the attack. Allies of the attacker do not block its path. Characters can attack through windows and other partial obstacles at a -2 penalty to hit.

Melee attacks must be made against an enemy in a space adjacent to the character. Thrown and short-range weapon attacks can be made against an enemy up to 10 spaces away. Long-range weapon attacks can be made against an enemy up to 25 spaces away.

Equipment

Money

Money takes the form of coins, with the gold piece being the standard unit. 1 platinum piece (pp) = 5 gold pieces; 1 gold piece (gp) = 10 silver pieces; 1 electrum piece (ep) = 5 silver pieces; 1 silver piece (sp) = 10 copper pieces (cp). Coins from different areas may look different and in some areas only coins from that area are acceptable, other coins will have to be exchanged for proper coins at a moneychanger who will take at least a 10% exchange fee.

To put the value of a gold piece into perspective, a single gold piece is enough for a peasant to subsist at a wretched quality of life for a month. Early in their career, adventurers will typically live on a few dozen gold pieces per month, enough to eat and sleep at an inn. A dragon's treasure hoard of 50,000gp might keep a village of peasants alive for decade, but merely cover a prince's monthly budget.

Standard Equipment List

Players, with the permission of the GM, may elect to roll their starting wealth in gold pieces and buy equipment piece by piece from the equipment list below. If this is done, each character starts with 120 + (3d6 x 5) gold pieces. The GM is free to modify the equipment list to suit the starting location in his campaign.

Skills: Non-intelligent creatures roll 1d20 + HD if they need to make a skill check. Intelligent creatures may have backgrounds which are added to their roll if appropriate to the check. Intelligent creatures may also have a class and level, if so they use the higher of their level or the HD as the modifier to the skill check roll.

Monster Advancement: To make a tougher monster, add more Hit Dice; each additional HD adds one to their skill and combat bonuses. Alternatively, add class levels to intelligent monsters. Start with the base Hit Dice and add levels of Fighter, Rogue, Mage or Cleric as required.

Create Your Own: Assign Hit Dice (d8 for most things). Attack bonus and skill level = number of Hit Dice. If it's an intelligent critter, +3 bonus to one skill. Add stat bonuses to suit.

Appendix C:

B/X Spell Lists

While spellcasters can use any spell in the SRD the GM permits in the game, the following short lists are the suggested spells that mages and clerics automatically have access to. They are the spells available in the B/X version of the world's most popular fantasy rpg. Other spells that the GM wishes to allow in the game can be found in spell books, scrolls, etc. and characters can attempt to learn them to add them to the spells they have access to. Learning a spell requires 1 week of study per level of the spell and a successful intelligence save vs a DC of 10 + (2 x spell level).

A Limited Wish (along with the actual simulacrum spell) is then used to imbue the animated form with intelligence and knowledge of the person being simulated. The simulacrum gains 1d4+2 times 10% of the simulated creature's knowledge and experience. The simulacrum follows its creator's orders. A simulacrum is not a perfect copy of the original. Side by side, the differences are obvious, and the simulacrum is detectable with a Detect Magic spell. R: 10 feet.

Polymorph Object: Spell allows any object to be turned into another object, animal, vegetable, or mineral. The degree of change will affect the spell's duration. Animal-to-animal changes, vegetable-to-vegetable changes, and mineral-to-mineral changes are all likely to remain permanent until dispelled. Thus, turning a human into an orc, or turning a wall into a pile of sand, would both result in a permanent change. On the other hand, turning a shrub into a thinking human being would last only a small number of turns. R: 240 feet. D: GM decides.

There is a 5% chance that the wrong being may be summoned, and (regardless whether the summoned being is the right one or not) there is a 5% chance that it will lack interest in the situation and return through the gate. The summoned being is not necessarily friendly to the caster, and may be extremely annoyed. R: 20 feet. D: 10 minutes.

Maze: This spell puts its victim in an extra-dimensional maze. After the determined time has elapsed the creature will reappear at the spot where it disappeared. The glowing colors form a layered spectrum; to destroy the sphere, each layer must be destroyed in turn from Red to Orange, to Yellow, to Blue, to Indigo, and then to the innermost Violet layer. Any creature of 7 or fewer hit dice that looks upon the sphere will be blinded for 1d6 turns. Anything attempting to cross into the sphere suffers the effects of each color that has not been negated.

Red: Causes 12 points of damage to the touch. Stops any magic arrows or missiles (including the spell Magic Missile). Negated by Ice Storm or other cold-based attack.

Orange: Causes 24 points of damage to the touch. Stops arrows and any other non-magical missile. Negated by Lightning Bolt or other electrical attack.

9th Level

Astral Spell: The caster projects his astral form into other places; the astral form is invisible to all creatures but those also on the astral plane. If the caster's physical body is moved beyond the range of the spell from its original location while the astral form is away, the link is sundered and the caster's soul becomes lost in the beyond. The spell range has no other effect. The astral form is capable of casting spells, but there is a 5% chance per spell level that the spell will fail. Additionally, there is a 2% chance per spell level of the attempted spell that the astral spell itself will falter as a result of the spell casting, and the astral form will return to the physical body. When astral traveling above the ground, the astral form may travel as fast as 100 miles per hour per level above 18th. If the form is traveling underground, its top speed is 120 feet/10-minute turn. With special study, this spell can also be used to travel to other planes.

Gate: Creates an opening to another plane of existence that can either be used to travel through or can be used to

Produce Fire: Creates normal fire covering an area of 10' X 10'. This spell may be reversed to extinguish fires covering the same area. R: 30 feet. D: 10 minutes.

Protection from Lightning: This spell negates the effects of electrical attacks upon the target. The spell ceases after such an attack. R: touch D: 1 hour + 10/caster level minutes.

Speak with Plants: Can understand and speak with plants. R: 30 feet. D: 1 hour.

5th Level

Commune with Nature: Same as the cleric spell Commune but must be performed outdoors and the answers received will only pertain to Nature. R: caster. D: 3 questions.

Control Winds: A druid may employ this spell to increase the force of, or calm, winds within 120' of the druid. The center-point of the spell's effect is the druid and follows the druid's movements. Such affected winds may influence flying creatures and sailing ships (forcing them out of the air or halting their maritime travel). A Control Winds spell cast upon an existing Control Winds spell will negate it. The spell's range is increased to 320 at 11th level, 400 at 12th level, and 480 at 12th druid level. R: 120 feet. D: 1 hour + 10/caster level minutes.

Hold Plant: Similar to the mage spell Hold Monster but affects living, magical or animated plants. This spell affects both treants and fungoid life forms. R: 30 feet + 10 feet/caster level. D: 1 hour + 10/caster level minutes.

Pass Plant: Allows the druid to enter one tree and emerge from another of the same species. The base distance travelled this way is 480 yards + modifier based on the tree type (Oak +120 yards. Ash, yew, linden, and elm - 120 yards. Other deciduous trees -180 yards. Coniferous trees -240 yards). The tree's girth must be large enough to engulf the druid. Travel must be from one living tree to another. If no such tree exists within the range of the spell, then the spell fails and the druid re-emerges from the starting tree. R: see above. D: 10 minutes.

Rock-Mud: Transforms rock to mud or vice-versa, up a 300x300 foot area. R: 120 feet. D: 3d6 days.

Sticks to Snakes: Turns up to 2d8 sticks into serpents. 50% chance each serpent will be venomous. R: 120 feet. D: 1 hour.

Wall of Fire: Deals 2d4 fire damage out to 10 ft. and 1d4 out to 20 ft. Passing through wall deals 2d6 damage +1/caster level. Wall lasts as long as caster concentrates on it. R: 60 feet.

6th Level

Animal Summoning III: Conjures 4 large animal (elephant, hippo, rhino, etc.), 12 medium sized animals (lions, tigers, bears, etc.) or 24 small ones (wolves, wild dogs, lynx, etc.) which will immediately appear. The animals conjured will obey the druid. R: 30 feet. D: 60 minutes.

Anti-Animal Shell: Same as the Anti-Plant Shell spell, but focuses on natural or giant animals. While affected by this spell, those inside the shell are protected from all animal attacks (excluding fantastic or magical creatures), but are unable to attack, be it by normal or magical means. R: 20 foot hemisphere. D: 30 + 10/caster level minutes.

Conjure Fire Elemental: Similar to the mage's Conjure Elemental spell but is limited to summoning a 16 HD fire elemental. On a roll of 1-2 on d20 the caster may choose to summon 1d3 salamanders instead, and on a roll of 1 on d20, the druid may choose to summon a 20 HD fire elemental. The elemental will not turn upon the druid but will regarding him as a friend of sorts. R: 30 feet. D: 1 hour.

Feeblemind: Subject's MIND drops to 1. R: 240 feet. D: until dispelled.

Finger of Death: Target must save or die. Will only work if druid's life in dire peril. R: 120 feet. D: instant but effects permanent.

Transport via Plant: Allows the druid to pass from one plant to any other plant of similar species anywhere, as long as the druid has seen the plant at one time. Should the emergence fail, the druid will instead emerge from another plant which may be miles away. A druid may choose to remain inside a plant instead of transporting from it, and may remain so for up to 24 hours. While within a plant in this manner, the druid is completely aware of his surroundings. D: instant or up to 24 hours.

Turn Wood: Creates a wall of force which moves away from the druid. Any wooden objects in the wall's path (weapon hafts, spear shafts, arrows, etc.) are pushed back, dragging back any creature holding such items. The length of the wall runs 60' to either side of the druid, and moves at a rate of 40' per turn. R: 20 x level feet. D: 10 + 10/caster level minutes.

Weather Summoning: The druid may call for any weather desired, limited by the current season and climate. Extreme weather conditions may only be summoned by an 11th level druid. The altered weather is not under the control of the druid. It takes $3 + 5d4$ - druid level 10 minute turns for the altered weather to arrive, but will be noticeable after 30 minutes. The duration of this spell varies according to the climactic changes brought about by the druid. A tornado may last a few turns, while torrential rains might last a few hours or day (GM's choice). R: 5 mile radius. D: variable.

7th Level

Animate Rock: Similar to a cleric's Animate Object spell, but only affects stone. Up to approximately 2 x level cubic feet of stone can be animated. The rock will move at 2-4" per turn, the faster speeds for rock-masses which are basically of an ambulatory shape such as statues. R: 60 feet. D: 1 hour.

Confusion: Subjects (up to 2d6 hit dice, only 4+ HD get save) behave oddly/cannot act effectively. R: 120 feet. D: 2 hours.

Conjure Earth Elemental: Similar to the mage's Conjure Elemental spell but is limited to summoning a 16 HD earth elemental. The elemental will not turn upon the druid but will regard him as a friend of sorts. R: 30 feet. D: 1 hour.

Control Weather: Caster can adjust weather. D: GM decision.

Creeping Doom: Summons a horde of 1D10 times 1000 small and deadly insects and arachnids. They appear within 1 to 3 minutes. They then move forward to attack whatever they are commanded to, provided it is within 60 feet at the time of the command. They will pursue until the prey is beyond a 240 feet range (or until it or they are otherwise destroyed). Can be used indoors or outdoors. R: 60 feet. D: see above.

Fire Storm: Creates a fire of intensity equal to a "wall of fire" in a large area. This magical conflagration lasts only 10 minutes, but all combustible material within the area affected will continue to burn thereafter. The spell can be reversed to extinguish normal fires in an area twice that of the maximum possible area of the druid's fire storm. There is a 5% chance per caster level of the reversed version extinguishing magical fires of up to the normal area. Area: 30 x 30 foot square area per caster level (must be contiguous). R: 60 feet.

Metal-Wood: Cast upon any metal (up to 5 pounds per level of the caster) it will permanently change it into some type of wood (caster's choice). R: 60 feet. D: instant but effects permanent.

Reincarnate: Restores dead person to life in a random (usually animal or nature-oriented humanoid) form. R: touch. D: instant.

Appendix E:

Early Edition Conventions

Almost any material you come across for 0e, B/X, or other early editions of the world's most popular roleplaying game can be used in Microlite2020 Old School Edition with little modification. However, there are some descriptive and play conventions that early editions used that may need explanation.

Time Conventions: Early editions talk about time in terms of rounds (combat rounds) and turns. In 0e, a round was 1 minute and a turn was 10 minutes. In B/X, a round was 10 seconds and a turn was 10 minutes, so there were 60 rounds in a turn.

Movement/Distance Conventions: Early editions gave distances in inches. When underground or in buildings or the like, one inch equaled 10 feet. When outdoors, however, one inch was 10 yards. Yes, this meant spell and weapon ranges were greater outdoors than indoors. Normal human movement (when carefully exploring) was 12" per move (unencumbered), with two moves per turn. Carrying too much weight cut this down to 9" (lightly encumbered), 6" (heavily encumbered), or even 3" (overencumbered). Running movement was double the above.

Encumbrance: Characters can normally carry twelve items in addition to armor, primary weapon, and possibly a shield; six items can be readily available dangling from a belt or slung over the shoulders, but everything else goes into the backpack. Small collections of things (10 flasks, 20 arrows, 50 gems, 100 gold pieces) count as a single item. Oversized items (two-handed weapons, anything as tall as the character or that requires two hands to carry) count as two items. A character carrying 6 or fewer items is unencumbered. A character carrying 7-12 items is lightly encumbered. A character carrying 13-18 items is heavily encumbered. A character carrying more than 18 items is over-encumbered. *Option:* Each unhealed Wound Point of damage a character takes adds one to the number of items a character is carrying for the purpose of determining encumbrance.

Descending Armor Class: 0e and other pre-3.x SRD editions used a descending Armor Class system where an unarmored character was AC 9 (AC 10 in some editions) and better armor used lower numbers (e.g. AC 5 was Chain, AC 2 was plate). Magic armor could even have a negative armor class. Microlite2020 OSE uses the ascending Armor Class system used in the OGL SRD. If you have old adventures using the original descending AC system and wish to use them, it is easy to convert descending ACs to ascending ACs.

Unarmored AC is 9: If the adventure is for 0e (or other edition where the unarmored AC is 9), subtract the descending AC listed in the adventure from 19 to get the ascending AC used by Microlite74.

Unarmored AC is 10: If the adventure is for 1e or 2e (where the unarmored AC is 10), subtract the descending AC listed in the adventure from 20 to obtain the ascending AC used by Microlite74.

Dungeon Exploration Conventions

Light: Humans and many other ancestries require a light source (or magical ability) to see in the dark. Torches, lanterns, etc. will produce limited areas of light (generally 20 feet of bright light and a further 10 feet of dim light), but they also make it easy for monsters to see the party coming, making surprise impossible. Torches can be blown out by strong gusts of wind (d6 roll: blown out on a 1 or 2). Most monsters living in a dungeon have infravision or some other means of seeing in the dark; however these methods do not work in the presence of a light source.

Seeing Monsters: Unless surprised, characters will see monsters when they are 2d4 x 10 feet apart. Surprise distance is 1d3 x 10 feet.

Wandering Monsters: The GM should roll 1d6 every 1d3 turns for wandering monsters (more often if the party is making a lot of noise or otherwise attracting attention). On a roll of 1, wandering monsters stumble across the party from a random direction and distance.

Avoiding Monsters: Unintelligent monsters normally automatically attack. Intelligent monsters may follow their orders, make a reaction check, automatically attack, etc. depending on circumstances. Unless surprised a party may try to flee to avoid a battle. Monsters will generally pursue if there is less than 120 feet between the two groups. Monsters will only pursue around a corner or through a door on roll of 1 or 2 on a d6 (1 if a secret door is used). Fire will deter many monsters. Food will distract many monsters: unintelligent monsters 90% of the time, semi-intelligent monsters 50% of the time, intelligent monsters 10% of the time. Treasure may also distract monsters: unintelligent monsters 10% of the time, semi-intelligent monsters 50% of the time, and intelligent monsters 90% of the time. All chances may be adjusted by the GM depending on circumstances.

Rest: One turn in six must be spent in rest or all characters suffer a -1 to all d20 rolls per rest missed. Time spent searching is not time spent resting.

Doors: Most dungeon doors must be forced open by strength; a character may make a STR save to attempt to force a door open. Doors with locks must be picked or forced at a minus equal to the dungeon level. Most dungeon doors will automatically close unless held or spiked open (spikes slip 20% of the time). Dungeon doors usually open automatically for monsters unless held closed.

Characters may wish to listen at doors before opening them. Unless a character has special listening abilities, a roll of 1 on a d6 will allow the character to hear through the door – if there is anything to be heard.

Traps: A trap will usually spring on a d6 roll of 1 or 2 when a character passes over or by them or otherwise triggers them.

Secret Passages: Characters will detect secret doors/passages doors on a d20 + MIND bonus roll (normal DC 16, 12 for Drawaves). A 10 x 10 foot area may be searched in a turn by a single character.

Wilderness Exploration Conventions

Seeing Monsters: Unless surprised, characters will see monsters when they are 4d6 x 10 yards apart. Surprise distance is 1d3 x 10 yards.

Wandering Monsters: The GM should roll 1d6 every day of travel for wandering monsters. If the party is camping, an additional roll should be made at night. If a wandering

monster is indicated (roll varies by terrain, see "Chance of Encounter" in terrain table below), wandering monsters stumble across the party from a random direction and distance. At night, the GM should randomly determine which watch is on duty when the attack is made.

Avoiding Monsters: Unintelligent monsters normally automatically attack. Intelligent monsters may follow orders, make a reaction check, automatically attack, etc. depending on circumstances. Unless surprised a party may try to flee to avoid a battle. Monsters will generally pursue so long as the party can be detected, there is a 50% chance monsters faster than the party will catch it (30% chance for monsters about as fast as the party) in each hex traveled through. Woods or swamp reduce the chance of being caught by 25%. Monsters will pursue into another hex on the map 50% of the time. The chase continues until combat occurs or the monsters break off. The party must rest for one-half day for each hex travelled during a pursuit. All chances may be adjusted by the GM depending on circumstances.

Becoming Lost: A group travelling off a well-marked trail or road without an accurate map or a knowledgeable guide may become lost. The chance of becoming lost is rolled on a d6 and depends on the type of terrain the party is in (see table below). If lost, the party actually moves in a random direction but believes they have moved in the direction intended.

Terrain Chart

Terrain Type	Chance Lost	Chance of Encounter
Plains	1	1
Woods	1-2	1-2
Forest	1-3	1-2
River	1	1-2
Swamp	1-3	1-3
Hills	1	1-2
Mountains	1-2	1-3
Desert	1-3	1-2
